RESEARCH AND DEVELOPMENT ON AUTOMOBILE SHREDDER RESIDUE COMPACTION, SOLIDIFICATION, DRY DISTILLATION, AND GASIFICATION TECHNOLOGY

December 1999

JAPAN AUTOMOBILE MANUFACTURERS ASSOCIATION
CONTENTS

ON THE PUBLICATION OF THIS BROCHURE

CHAPTER 1. OVERVIEW

1. Automobile Recycling - Current State and Issues
   1.1. Amount of ELVs and State of Recycling
   1.2. Toughening of Standards for Disposal of ASR at Landfills
   1.3. JAMA Approach to Processing of ASR
   1.4. Current Recycling Rate of Automobiles

2. ASR Thermal Recycling Technology - Current State and Issues
   2.1. Conditions for Achievement of 95% Recycling Rate as Seen From Composition of ASR
   2.2. State of Development of Thermal Recycling Technology of Refuse
   2.3. Incineration of ASR - Experiments and Problems

3. JAMA Plan for Development of ASR Recycling Technology
   3.1. JAMA’s Development Concept
   3.2. Phase 1: Sorting, Compaction, and Solidification Technology
   3.3. Phase 2: Selection of Dry Distillation and Gasification Technology for Compacted and Solidified ASR
   3.4. Phase 3: Basic Research on Use of Residue
   3.5. Development Schedule

CHAPTER 2. RESEARCH FINDINGS

1. Sorting, Compaction, and Solidification Technology
   1.1. Development of Sorting, Compaction, and Solidification Equipment
   1.2. Development of ASR Extruder
      1.2.1. Comparative Evaluation of Single-Screw System and Twin-Screw System
      1.2.2. Comparative Evaluation of Hydraulic Drive System and Electrical Drive System
      1.2.3. Development of Single Nozzle for Prevention of Clogging
      1.2.4. Comparative Evaluation of One-Stage Solidification System and Two-Stage Solidification System
1.3. **Optimal Operating Conditions**
   1.3.1. Conditions for Controlling ASR
   1.3.2. Optimal Operating Conditions of Sorting Equipment
   1.3.3. Optimal Operating Conditions of Compacter and Extruder

1.4. Crush Conditions and Yield of Glass

1.5. Costs of Eddy Current Separators and Standards for Aluminum Recovery Rate

1.6. Mesh Size of Screens of Slant Vibration Separator Designed for Recovery of Glass in ASR

1.7. Sorting of Wire From ASR

1.8. Effect of Compacting of ASR

1.9. Effect of Prevention of Elution of Lead
   1.9.1. Prevention of Elution of Lead From Formed Product
   1.9.2. Prevention of Elution of Lead From Glass, Earth & Sand (Effect of Addition of Cement)

1.10. Points to Note When Designing Plants
   1.10.1. Size of ASR Receiving Yard
   1.10.2. Installation of Sprinkler System
   1.10.3. Crusher at Time of Operation
   1.10.4. Cooling of Formed Product

2. **Spontaneous Ignition**
   2.1. Object
   2.2. Study
   2.3. Findings
   2.4. Future Issues

3. **Dry Distillation and Gasification**
   3.1. Development of Dry Distillation and Gasification Apparatus
   3.2. Survey of Temperature Conditions of Dry Distillation of Solidified ASR
   3.3. Effect of Thermal Recycling (Energy Recovery = Input Calories x 5)
   3.4. Concentration of Dioxins
      3.4.1. Concentration of Dioxins in Exhaust Gas of Combustion
      3.4.2. Concentration of Dioxins in Dry Distillation Residue
   3.5. Treatment of Chlorine in ASR
      3.5.1. Total Balance of Chlorine
      3.5.2. Effect of Reduction of HCl by Addition of Ca(OH)₂
3.5.3. Effects of Dechlorination by Heating of Dry Distillation Gas

3.6. Dry Distillation Residue
   3.6.1. Purity of Copper in Dry Distillation Residue
   3.6.2. Findings of Elution Test of Dry Distillation Residue
   3.6.3. Adsorption Ability of Dry Distillation Residue

3.7. Dry Distillation Gas Components

3.8. Particulate Matter and Metal Concentration

3.9. Findings of Examination of Cooling Tank Water Quality

3.10. Shape and Basic Performance of Secondary Incineration Furnace

4. Basic Surveys Related to Utilization of Dry Distillation Residue
   4.1. Recycling Technology Using Wet Crush of Dry Distillation Residue and Carbon Flotation
   4.2. Survey of Slag-Forming Technology of Dry Distillation Residue Using CEP

CHAPTER 3. CONCLUSIONS

CONCLUSIONS

MEMBERS OF R&D PROGRAM FOR DEMONSTRATING COMPACTION, SOLIDIFICATION, DRY DISTILLATION, AND GASIFICATION

* For details on the report, please see the CD-ROM.
